About the Course

ART 1301 Course Description: Art Appreciation is a study of the visual arts for non-art majors emphasizing an investigation of the nature of art – past and present, in western and non-western cultures. Students will learn to recognize art not only as the expression of individual artists but also as the reflection of wider cultural identities (religious, political and social). To achieve this goal, students will learn to identify the basic formal elements underlying all art forms, the processes by which visual art is created, and the many ways of “seeing” and “interpreting” works of art.

Student Learning Outcomes: Upon completion of this course, students should be able to:

- Identify and describe a body of art works (individually and collectively) in the creative arts. Methods for assessing this expected learning outcome: Exams.
- Analyze and summarize the elements of art and the principles of design. Methods for assessing this expected outcome: In class & online discussion
- Explain and differentiate creative works as expressions of values within cultural and historical contexts. Methods for assessing this expected outcome: Written assessments. -online assignments
- Learn about individual artists and their role in society.
- Appraise the role of diversity (gender, nationality, ethnicity, politics, and religious beliefs) in the development of visual culture – past, present, and future.
