DEMR 1310 (3:2:4)

Diesel Engine Testing & Repair I

Diesel Service Technology

Industrial Technology

Technical Education Division

South Plains College

Levelland, Texas

Spring 2024

Course Title: Diesel Engine Testing & Repair I

Instructor: Michael Reimer

Office: #204 Auto-Diesel (Upstairs)

Phone: 806.716.2295

Email: mreimer@southplainscollege.edu

Office Hours: Will be published by the 12th class day

South Plains College Improves Each Student's Life

General Course Information

Course Description

The purpose of this course is to provide the student with an introduction to the basic principles of diesel engines and systems.

Course Learning Outcomes

The student will describe the history of diesel engines and diesel systems and their evolution; demonstrate knowledge of the basic principles of diesel systems and engines and how they function; and utilize precision instruments to diagnose and repair basic systems and engines.

Course Competencies

This course uses established industry competencies. Upon completion of this course the student must demonstrate the ability to:

Describe the history and evolution of diesel engines and sub-systems.

Explain how the basic principles of diesel systems and engines can be applied to different types of diesel engine makes, configurations, and applications.

Use industry standard computers and precision equipment to diagnose and repair the basic systems and engines.

Locate pertinent service information on computer-based manuals.

SCANS and Foundation Skills

C1 through C20 and F1 through F17. A description of these SCANS skills is printed on the back of the syllabus cover sheet for reference.

Verification of Workplace Competencies

All graduating students in the diesel service technology program will have a comprehensive, exit review exam administered in order to comply with the state requirement for a capstone learning experience.

Specific Course / Instructor Requirements

Required Materials

Course Unlimited-Access (24 Months) ISBN: 9780357700051

- Available in the bookstore, you will only need one copy for all of your Diesel courses. *(You must have e-book access to the course materials before the first week of classes are over. Failure to have your e-book access on the 2nd day of class will result in falling behind and missing critical assignments. If prolonged you will not be able to continue and may be dropped from this course.)*

Tools per provided list.

Notebook (quality, you will be using it in the lab. One may be shared across all of your DST classes.)

Writing utensils.

Safety Glasses.

Safety Toe Shoes. (*Will be worn everyday regardless of whether in a classroom or in the Lab area/Maintenance Bay. Anything less than safety toed shoes will result in dismissal for the day and will be counted as an absence.*)

ANSI Cut Level 3 Gloves

Pocket Knife (not a box cutter).

Recommended Materials

Daily or Weekly Planner

The Required Materials are required to perform the coursework; therefore, students who do not have the required items, specifically Cengage book access, safety glasses, safety toe shoes and tools listed on the required tool list will be dropped. **Failure to provide these required materials by the second-class day and maintain them through the entire semester will result in an administrative drop from the course.**

Syllabus Agreement

This syllabus is a contract with the student and is used in college courses to outline the expectations of the course, the student, and the instructor. **If a student does not read the syllabus, sign, and turn in the Student Syllabus Agreement by the Due Date they will be Administratively Dropped from the course.** Digitally sign, and submit the Student Syllabus Agreement form, expressing that you have read, understand, and agree to the course rules and expectations outlined in the syllabus.

Safety

Students must pass the Safety Test with a score of 100 before they will be allowed to participate in lab work. Students will obey the safety and shop rules at all times. Failure to do so can result in dismissal from class with an absence, or with repeat offenses, administrative drop.

Student Conduct

Student Conduct will follow the outlines of the Student Guide (<http://catalog.southplainscollege.edu/mime/media/view/53/1585/2020-21StudentGuide.pdf>) for anything not covered under the purview of this syllabi.

Failure to follow lab rules and course directives may result in being excused from class with an absence at the instructor's discretion.

Students will not smoke or vape in the building. That is a violation of campus policy and will be treated as such.

Academic Integrity

Cheating and/or plagiarism will result in a zero grade on that assignment; the instructor may drop you from the class, zero related assignment grades, and disciplinary action may be taken with referral to the Dean of Students. Plagiarism and cheating are serious conduct offenses and will be treated as such. .

Attendance

Students that attains more than two (2) absences are considered excessively absence, and there are no excused absences. An absence will be issued when a student attends less than three quarters (3/4) the scheduled time, for that particular day, leaves class without notifying the instructor. Students who have a grade average

below 70 and excessive absences will be dropped, and may also be dropped from concurrent courses. A student is tardy if they are not present when roll is taken. Two (2) tardy circumstances are equal to one absence.

Sleeping in Class or Lab

The inability to stay awake in class or lab is an indication that you are too tired to function safely in our environment, and you will be dismissed for safety reasons. This is considered an absence since you are not present.

Bullying, Hazing & Other Misconduct

Bullying, hazing, or any other misconduct toward fellow students, the instructors or visitors to the program will not be tolerated. Disciplinary action will be taken per the standards set in the Student Handbook and may lead to expulsion. The instructor may choose to excuse you from class with absence.

Work Missed if Absent

Students are responsible for all work covered during absences from class, even in cases in which they are able to satisfy the instructor that the absence was unavoidable. When an unavoidable reason for class absence arises, such as illness, an official trip authorized by the college or an official activity, the instructor may permit the student to make up work missed. In such case, it is the student's responsibility to complete work missed within a reasonable period of time as determined by the instructor. This is merely for work missed, and does not make any absence excused. This does not apply to classroom tests/quizzes or lab tests/quizzes.

Late Assignments

Assignments turned in after the assigned due date will not be accepted and will result in a zero grade for that assignment. Reasonable circumstances for a late assignment may be accepted with a penalized grade with the instructor's permission.

Personal Property Responsibility

As future Diesel Technicians, it's crucial to be accountable for your personal property. The school and instructors are not responsible for any loss, damage, or theft of your belongings. Follow these guidelines:

1. **Secure Your Tools:** Keep your personal tools and belongings in designated areas or securely stored during class and on campus.
2. **Avoid Leaving Valuables Unattended:** Never leave valuable items unattended. Keep them with you or secure them in lockers.
3. **Use Locks:** When necessary, use locks on toolboxes or storage containers to add an extra layer of security.
4. **Take Your Toolbox Home:** Students must take their toolbox home before the end of the semester or within 5 days of withdrawing from class. This ensures the safety and security of your tools.
5. **No School Property in Your Toolbox:** Students are prohibited from keeping any school property in their toolbox. School property must be returned to designated areas promptly.
6. **Report Any Issues:** If you notice anything suspicious or concerning, report it promptly to campus security.
7. **Label Your Tools:** Ensure your tools are labeled with your name for easy identification.

Remember, personal property is your responsibility. Following these guidelines will help protect your tools and belongings throughout your training. The school and instructors are not liable for any losses, so take proactive steps to safeguard your possessions.

Grading

Exams will be given periodically throughout the semester at the instructor's discretion. Lab assignments will be given and completed at the assigned dates. At the end of the semester, a comprehensive final exam will be given. There are five categories taken into consideration when computing the final semester grades: Lab Assignments: 50%, Tests: 25%, Homework 20%, Attendance 5%.

- a) Lab Assignments 50%
 - i) The Lab Assignment section includes, but is not limited to, hands on assignments, lab tests lab task sheets and daily lab grades.
 - ii) Point deduction from lab:

- (1) Late or not showing up for the end of semester clean-up will result in forfeit of all lab points.
- (2) Leaving a lab project partially disassembled, leaving out parts, or not turning in complete work order results in a zero on that assignment.
- iii) Damaging lab projects, even if it is someone else's project, will result in a deducted grade for projects as follows:
 - (a) Damaged, but repaired correctly -5 points
 - (b) Damaged, required part replacement -10 points
 - (c) Damaged, not repairable -50 points
 - (d) Damaged, abandoned -100 points
- (2) Absences will result in a zero-lab grade for each day you are absent.
- (3) Taking far longer on a lab project than necessary by not staying on task or working diligently and continuously on a module may result in a zero grade on that assignment.
- iv) **Note:** When you apply for a signature on an assignment, you will be randomly, verbally, quizzed on your knowledge of the project, procedures, etc. Inability to answer questions will result in an incomplete until you comply with the research assigned at that moment.
- b) Tests 25%
 - i) Midterm tests cover several sections of related materials. Absence on test days results in a zero grade.
- c) Homework: Quizzes, Book Assignments, Worksheets, etc. 20%
 - i) Daily reading assignments, workbook assignments and Blackboard quizzes are designed help you learn the material more efficiently and prepare you to participate in class. You are expected to show your work through the assignments under Homework.
- d) Attendance 5%
 - i) Showing up is a major factor in your success as a technician and your ability to get and keep a job. Showing up on time and staying the whole time will result in a 100 for the day. Late arrival, returning late from break or disappearing for significant amounts of class time will result in a Tardy, creating a 50 for the day. No show results in a 0 for the day. In the case of an emergency or illness, timely notification of the situation (I don't need details), and as applicable a doctor's note, can adjust those grades.
- e) Grade Levels: There are four levels of attainable grades in the diesel technology program. The levels are A - (90 and above); B - (80-89); C - (70-79); F - (69 and below). This grading policy follows industry standards used in certification testing.

Hazardous Materials

Students will come in contact with chemicals and other materials, which come under the "Hazardous Material" classification as defined by Title 83, Article 5182b of the Hazard Communication Act. Material Safety Data (MSD) information will be posted in the lab area. Safety information will be given and shown in class before the safety test. (Examples of materials: used engine oil, fuel, antifreeze, etc.)

Accommodations

Students can find statements for:

Intellectual Exchange, Disabilities, Non-Discrimination, Title IX Pregnancy Accommodations, CARE (Campus Assessment, Response, and Evaluation) Team, and Campus Concealed Carry at

<https://www.southplainscollege.edu/syllabusstatements/>

DST Classroom and Lab Area Rules

1. Always follow safety rules. They are for your protection.
2. Personal Protection Equipment: Safety glasses will be properly worn at all times. Acceptable lens colors: clear, yellow colored lenses. Mirrored or dark lenses will be permitted for outside work only. Sunglasses will not be allowed indoors or outdoors. All safety glasses must be "ANSI Z-87-1" or better certified. Safety toe footwear are required and will be worn at all times. Non-compliance will result in dismissal for the day with an absence.
3. Service bay doors will be either fully raised or lowered. Not left partially open.
4. No tobacco products are allowed in campus buildings, and smoking must not be done within 25 feet of the building, per campus policy. This policy includes vaping.
5. No shorts to be worn in the lab areas. Clothing should be well-fitting and appropriate for work. Clothing with obscene, profane or otherwise inappropriate language or images will not be allowed.
6. No student parking is allowed inside the south fenced-in area.
7. The DST program adheres to the South Plains College zero tolerance policy for controlled substances. Should an instructor suspect a student is under the influence of drugs or alcohol while on campus, they will remove the student from class and/or lab and the appropriate disciplinary measures will be enforced.
8. All electronic devices will be used only for course related work. Inappropriate and/or unrelated use of electronic devices, including cell phones, can result in your dismissal for the day with an absence.
9. You are required to have your own tools to be able to participate in class.
10. Do not store South Plains College tools, equipment or project parts in your toolbox. If you do put SPC property in your box, we can and will use any means necessary to open your box if you are not present. While your box is present in our facility, it is subject to search at any time at an instructor's discretion. We are not responsible for any damage or losses that may occur due to this policy. You are welcome to register a spare key with your instructor for the semester to avoid such situations.
11. In accordance with Texas Commission on Environment Quality (TCEQ), there are to be no open or unlabeled containers in the lab or classroom areas. Only small quantities may be held in open containers, which must be labelled, and currently in use.
12. All SPC property, including equipment keys and tools, must be put away at class clean up. You are responsible for putting away all your personal tools, sorting equipment neatly and disposing of all trash daily.
13. When lifting/moving materials, equipment, etc with the forklift, gantry or engine lifts must be safely secured and use of a safety chain is required where applicable.
14. Maintain awareness of your surroundings and your peers in the lab.
15. Maintain a clean workspace, clean up spills, debris, etc. immediately, and clean up your workspace and tools daily.
16. Do not drive bearings with hard steel tools.
17. Do not spin bearings or turbochargers with compressed air.
18. Intentional destruction of school property will result in immediate dismissal from the program.
19. You will be around chemicals, electricity and moving equipment, exercise caution and self-awareness in your actions and daily assignments.

Required Tool List

Tool Box – Recommend a rolling box, of sufficient size to hold your tools for class, but not so large as to be difficult to manage in limited space.

Combination Wrench Set – SAE Fractional and Metric

½ drive Ratchet & Socket set – SAE Fractional and Metric, Shallow and Deep

½ drive extension & wobble set

½ drive breakover bar – Recommend a 24 inch handle.

3/8 drive ratchet & socket set – SAE Fractional and Metric, Shallow and Deep

3/8 drive extension & wobble set

¼ drive ratchet & socket set, SAE Fractional and Metric, Shallow and Deep

¼ drive extension & wobble set

Channel lock pliers

Needle nose pliers

Vice grip pliers

Electrical pliers with strip and crimp

Fixed tip snap ring pliers - straight & 90* (can be found in sets or individual)

Screwdriver set with Philips and Flat Head

Allen wrenches – Metric & Standard

Torx bit set

16 oz Ball Peen hammer

Soft face dead blow hammer

Cold steel punch set

Heel bar set

Pry bar set

Gasket scraper

Inspection Mirror

Magnetic pickup tool

Pocket knife

O-ring Pick set

Feeler blade set – recommend angled. Do not buy tapered feelers, you will not be allowed to use a tapered set.

Digital Volt Ohm Meter – Please choose a quality meter, as lower cost meters have a large

margin of error and can negatively affect your electrical diagnosis.

Safety Glasses that are ANSI Z87 rated, or better.

Safety Toe boots

Optional

Laptop - Recommend a computer with Windows operating system, which works best with industry software, and can interact with school computers without any compatibility issues. Also choose one with at least one USB port for file transfers. We do not recommend tablets/ipads because they do not have the same level of function and compatibility as a laptop, and often do not have the memory space.

Forbidden

Crescent Wrench

Claw Hammer

Test Light

Power Probe

Student Syllabus Agreement

I, _____ (Name), have read and understand the syllabus for **DEMR 1310 Diesel Engines Testing and Repair**, the rules outlined there, as well as the attendance, academic integrity and grading policies. I agree to abide by and follow the rules and policies of the syllabus, as well as the South Plains College Student Handbook. I understand that if I do not pass the Safety Test with a score of 100 I will not be allowed to continue in the program. I understand that by not reading the class syllabus, signing and turning in this Student Syllabus Agreement I am forfeiting my enrollment in the class and I will be dropped.

Date: _____

Signature: _____

SCANS COMPETENCIES

C-1 **TIME**--Selects goal--relevant activities, ranks them, allocates time, and prepares and follows schedules. C-2 **MONEY**--Uses or prepares budgets, makes forecasts, keeps records, and makes adjustments to meet objectives C-3 **MATERIALS & FACILITIES**-Acquires, stores, allocates, and uses materials or space efficiently. C-4 **HUMAN RESOURCES**--Assesses skills and distributes work accordingly, evaluates performances and provides feedback.

INFORMATION--Acquires and Uses Information C-5

Acquires and evaluates information.

C-6 Organizes and maintains information.

C-7 Interprets and communicates information.

C-8 Uses computers to Process information.

INTERPERSONAL--Works With Others

C-9 Participates as members of a team and contributes to group effort.

C-10 Teaches others new skills.

C-11 Serves clients/customers--works to satisfy customer's expectations.

C-12 Exercises leadership--communicates ideas to justify position, persuades and convinces others, responsibly challenges existing procedures and policies.

C-13 Negotiates-Works toward agreements involving exchanges of resources resolves divergent interests.

C-14 Works with Diversity-Works well with men and women from diverse backgrounds. **SYSTEMS--**

Understands Complex Interrelationships

C-15 Understands Systems--Knows how social, organizational, and technological systems work and operates effectively with them

C-16 Monitors and Correct Performance-Distinguishes trends, predicts impacts on system operations, diagnoses systems' performance and corrects malfunctions.

C-17 Improves or Designs Systems-Suggests modifications to existing systems and develops new or alternative systems to improve performance.

TECHNOLOGY--Works with a variety of technologies

C-18 Selects Technology--Chooses procedures, tools, or equipment including computers and related technologies.

C-19 Applies Technology to Task-Understands overall intent and proper procedures for setup and operation of equipment.

C-20 Maintains and Troubleshoots Equipment-Prevents, identifies, or solves problems with equipment, including computers and other technologies.

FOUNDATION SKILLS

BASIC SKILLS--Reads, writes, performs arithmetic and mathematical operations, listens and speaks F-1

Reading--locates, understands, and interprets written information in prose and in documents such as manuals, graphs, and schedules.

F-2 Writing--Communicates thoughts, ideas, information and messages in writing, and creates documents such as letters, directions, manuals, reports, graphs, and flow charts.

F-3 Arithmetic--Performs basic computations; uses basic numerical concepts such as whole numbers, etc. F-4

Mathematics--Approaches practical problems by choosing appropriately from a variety of mathematical techniques.

F-5 Listening--Receives, attends to, interprets, and responds to verbal messages and other cues.

F-6 Speaking--Organizes ideas and communicates orally.

THINKING SKILLS--Thinks creatively, makes decisions, solves problems, visualizes, and knows how to learn and reason

F-7 Creative Thinking--Generates new ideas.

F-8 Decision-Making--Specifies goals and constraints, generates alternatives, considers risks, and evaluates and chooses best alternative.

F-9 Problem Solving--Recognizes problems and devises and implements plan of action.

F-10 Seeing Things in the Mind's Eye--Organizes and processes symbols, pictures, graphs, objects, and other information.

F-11 Knowing How to Learn--Uses efficient learning techniques to acquire and apply new knowledge and skills. F-

12 Reasoning--Discovers a rule or principle underlying the relationship between two or more objects and applies it when solving a problem.

PERSONAL QUALITIES--Displays responsibility, self-esteem, sociability, self-management, integrity and honesty

F-13 Responsibility--Exerts a high level of effort and preservers towards goal attainment.

F-14 Self-Esteem--Believes in own self-worth and maintains a positive view of self.

F-15 Sociability--Demonstrates understanding, friendliness, adaptability, empathy, and politeness in group settings.

F-16 Self-Management--Assesses self accurately, sets personal goals, monitors progress, and exhibits self-control.

F-17 Integrity/Honesty--Chooses ethical courses of action.
